

Western Cooling Challenge Participants

The following companies have agreed to participate in the Western Cooling Challenge. Each of the companies has chosen to participate as an original equipment manufacturer or a component supplier or both.

Company
Original Equipment Manufacturer
Component Supplier

AMAX (www.coolingsolutions.us.com)
Air handling equipment with evaporative and refrigeration components

Coolerado (www.coolerado.com)
Hybrid cooling units with indirect evaporative cooling
Advanced indirect evaporative cooling module

Desert Aire (www.desert-aire.com)
Dehumidification and dedicated outdoor air supply equipment

Ice-Energy Incorporated (www.ice-energy.com)
Modular ice storage equipment and controls technologies

Integrated Comfort Incorporated (dualcool.net)
DualCool condenser direct pre-cooler with indirect outdoor air cooling

Munters (<http://www.munters.us/en/us/>)
Full of roof top humidity control equipment combining evaporative and refrigeration components

Munters-Des Champs Technologies
(www.des-champs.com) & Davis Energy Group Inc. (www.davisenergy.com)

Roof top humidity control equipment, in partnership Davis Energy Group

NovaTorque Inc. (www.novatorque.com)
Super-efficient, variable speed motors

Seeley International, Pty Ltd. (www.seeleyinternational.com)
Manufacturer of natural climate control solutions using direct and indirect cooling components
Advanced indirect evaporative cooling module

Thermal-Flow (www.thermalflow.net)

Fluid coolers for RTUs

Trane(trane.com)
Full line of Heating, Ventilation and Air Conditioning Equipment

In addition, several companies are still working through their approval process and may be added to this list. The WCC is designed to encourage multiple winners so additions at a later date will only contribute to the success of WCC.
